

# RAPTOR® & iCONE

FINDING YOUR WORK ZONE  
WITH ADVANCED TECHNOLOGY

## ADVANCING WORK ZONE SAFETY AND DATA ACCESSIBILITY

Autonomous vehicles and advanced driving systems will represent a significant segment of America's fleet. During this advancement, the Department of Transportation is making travel on public roads safer and more efficient through universal access to data on work zone activity.

## ROADQUAKE AND RAPTOR DELIVER SHORT DURATION WORK ZONE DATA

PSS has integrated the iCone ConnectedTech™ device with the RAPTOR Rumble Strip Handling Machine. Temporary Portable Rumble Strips (TPRS) are now more than a distracted driving counter measure; they make your work zone more visible.

Today, RAPTOR can provide data locations of the RoadQuake Safety System. With this technology, agencies and road users will know the locations of these work zones:

- » Short-Term Stationary
- » Short Duration
- » Maintenance
- » Utility

It has never been easier to use technology to gather location information for more work zones. Let us show you how to improve work zone safety on your roadways, contact David McKee, at 216-403-0898 or at [david.mckee@pss-innovations.com](mailto:david.mckee@pss-innovations.com).
